IP Surveillance
Design & Implementation Training

Dear Valued Customer,

Thank you for your interest in KITS technologies.

Throughout the year, KITS Technologies offers latest and relevant ICT industry leading technology-focused technical trainings. These technical Hands-on courses are geared towards maximizing the benefits of choosing IT / Telecoms as career. These classes are taught by experienced professionals / ICT trainers and have technical focus. Whether you are thinking of building a career in IT/Telecoms, or you are already in the industry, you will benefit tremendously from attending these specially designed technical classes.

The courses are aimed at boosting and complementing theoretical knowledge with real practical knowledge which has today become a major requirement for any ICT job globally and Nigeria in particular. KITS TECHNOLOGIES desires to empower the computer biased growing youths of the Nation with necessary ICT skills required to make them partake in the present global knowledge based economy. Participants shall through this program acquire the required skills necessary to start a career in the vibrant IT/Telecoms industry. Equally, technicians and those who intend to switch to IT/Telecoms Industry will have the 'rare' opportunity to acquire necessary skills to upgrade their competencies and add substantial value to their productivity as ICT professionals.

The program is packaged and customized in scope and content to suit the needs of beginners to intermediate level Engineers to become expert professionals in IT/ Telecoms engineering.

Please visit our website (www.kits.ng) regularly for updates as new ICT courses will be added from time to time as the industry is changing by its dynamic nature.
